**ABSTRACT OF PRESENTATION:**

Presented here are statements found in the *Cataloging Service Bulletin* regarding the use of “AACR2 Compatible” headings. I present them simply to provide some historical context for using this approach when AACR2 was implemented and hope that the 26-year history of dealing (or not dealing, really) with these headings will illuminate our thinking as members of the BIBCO/CONSER Operations Committees as well as PCC’s Policy Committee as we discuss the issues related to compatibility of AACR2/RDA headings and the options that will work best for working during this transitional period.

Discussion questions are posed to gather operation representative consensus on selected PCC compatibility issues.

**PARTICIPANT PREPARATION AND INVOLVEMENT:**

Participants will read: “*Name Authority Records: AACR2/RDA Compatibility Issues*” and consider the discussion questions listed there before the meeting.
